

## ROYAL LONDON GOVERNED RANGE TACTICAL ASSET ALLOCATIONS – 12TH JULY 2018

Our Investment Clock may enter its 'Stagflation' phase during summer, as inflation tracks slightly higher while global growth cools, especially outside the US. Stocks are flat year-to-date after a burst of volatility that marked a global growth peak; a deteriorating economic backdrop and talk of trade wars signal further volatility.

We continued to take profits on our equities position, where the overweight is the lowest since 2012, and reduced our overweight commodities allocation; the proceeds were moved into government bonds and cash, reducing underweights. We are modestly overweight global equities, global high yield bonds and commodities.
